## **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/03/2006 has been entered.

1. Claims 1,2,5-18, 22-45 are pending.

## Claim Rejections - 35 USC § 103.

2. Claims 1,2,5-18, 22-45 are rejected under 35 U.S.C. 103(a) as obvious over Zenhausern (US 20020094531; priority date 06/14/1999). The rejection is maintained for the reasons of record and in view of the following.

## Response to arguments

Applicant argues that Zenhausern does not teach parallel processing of multiple samples. Examiner disagrees. The reference teaches analyzing plurality of biomolecules ("at least one biomiolecule", see, e.g., claim 1) using plurality of sensing probes ("the *n* number of sensing probes can be at least one mass spectrometer" – see paragraph [0047]). For example, the method of Zenhausern can be used to analyze the results of peptide degradation, e.g., by multiple cycles of Edman degradation, i.e., to

analyze multiple multicomponent samples at multiple time intervals. See paragraphs [0068], [0070].

3. Claims 1,2,5-18, 22-45 are rejected under 35 U.S.C. 103(a) as obvious over Chang et al and Demirev et al and Chalmers et al. and Zeng et al in view of Zenhausern, and further in view of Henry et al, Cotter et al., and Orient et al. The rejection is maintained for the reasons of record and in view of the following.

Applicants have traversed the primary and the secondary references pointing to the differences between the claims and the disclosure in each reference. Applicant is respectfully reminded that the rejection is under 35 USC103 and that unobviousness cannot be established by attacking the references individually when the rejection is based on the combination of the references. It has been well established that the test for combining references is not what individual references themselves suggest but what the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. *In re McLaughlin*, 170 USPQ 209 (CCPA 1970)

With respect to Zenhausern reference, see discussion above. Also, applicant again argues that the referenced method is directed to analysis of a single sample, and is not teaching combining mass spectrometer systems into an array. Neither of these statements is correct.

With respect to Henry et al., Cotter et al., and Orient et al., the references were cited merely to demonstrate that there is technology available now, simplified

Art Unit: 1631

small and light-weight mass-spectrometers, that would makes reasonable to combine mass-spectrometers into arrays (e.g., as taught in Zenhausern) without being udesirable because of high cost of operating multiple mass-spectrometers. One would expect that analyzing multiple samples using a set of analytical devices (i.e., mass spectrometers) would be at least as effective as using a single analytical device.

This is an RCE of applicant's earlier Application No. 09/835273. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571) 272-0811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
